

Flexitron[®]

Brachytherapy Afterloading Platform

Safety through simplicity

Redesigning treatment delivery

To maintain a high level of care, Elekta designed a brand new afterloading platform for brachytherapy: Flexitron. Putting the user—not the technology—first, Flexitron offers a logical workflow and intuitive user interface.

Why Flexitron?

Providing your oncology patients with the best possible care, consistently and over time, is a high priority. Accuracy and efficiency in treatment delivery are more important than ever, as is the need to reduce the possibility of human error – often the result of complex technology and a complicated workflow.

- Designed for safety by reducing workflow complexity
- Boosting your clinical team's confidence and efficiency
- Connectivity to OIS, such as MOSAIQ®
- Safe investment in treatment delivery solution with future upgrade potential

“As head of the university department, I always want to be on top of new developments. I believe with Flexitron we have made a sound investment for the future.”

Prof. G. Kovacs UMC Schleswig-Holstein, Germany

Intuitive user interface with Smooth navigation saves time.

A new standard in treatment delivery

Flexitron offers a logical workflow and intuitive system operation providing more logic and fewer variables. Flexitron has optimized the treatment delivery process based on an analysis of your workflow. With five simple yet ingenious features,

we have created a new way of working, introducing a new standard in treatment delivery. Flexitron helps your clinical team to work safely and efficiently so you can be confident that the execution of all steps in the workflow will proceed as planned.

Reconstructing catheters

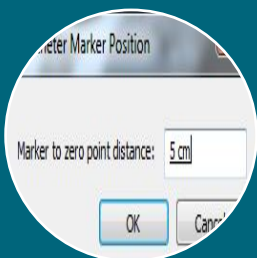

1 | Reconstruct the catheters within the treatment or target area

2 | Select any point on the CT-marker for each catheter; there's no need to fill in the indexer length and offset

3 | Use the point as a marker with a defined distance

4 | Enter the distance from the connector end of the catheter, this is the marker to zero point distance

5 | Plan your dose distribution

The result

Accurate, reproducible and safe treatment delivery.

Plan to perform

When Oncentra® Brachy treatment planning (v4.5) is used in combination with the new Flexitron afterloading platform, you will optimally benefit from a number of smart features that allow an easy, standardized way of treatment planning—while feeling confident about accurate and safe treatment delivery. Benefit from constant settings, such as a fixed step size.

Because all transfer tubes have a fixed length (1000 mm), the reference length will always be the same. The forward stepping source boosts your confidence about treatment accuracy (0.5 mm). For flexible catheters, dedicated CT-markers help you reconstruct and measure the source path length during the planning process. The friendly user-interface helps you save time.

A platform designed for you and your patients

Flexitron offers both patients and clinicians the benefits they deserve. Your patients will receive the most sophisticated and safest brachytherapy procedure possible, and physicians can now deliver brachytherapy with more efficiency and ease of use than ever before.

Tailored to your practice

Scalable

The scalable Flexitron platform with 10, 20 or 40 channels can easily be tailored to the evolving needs of your brachytherapy practice.

Connected

Flexitron connects with MOSAIQ® and other DICOM Unified Worklist compliant oncology information systems.

Compatible

With Flexitron we offer a full brachytherapy solution. Flexitron is compatible with our applicators and Oncentra® Brachy treatment planning system.

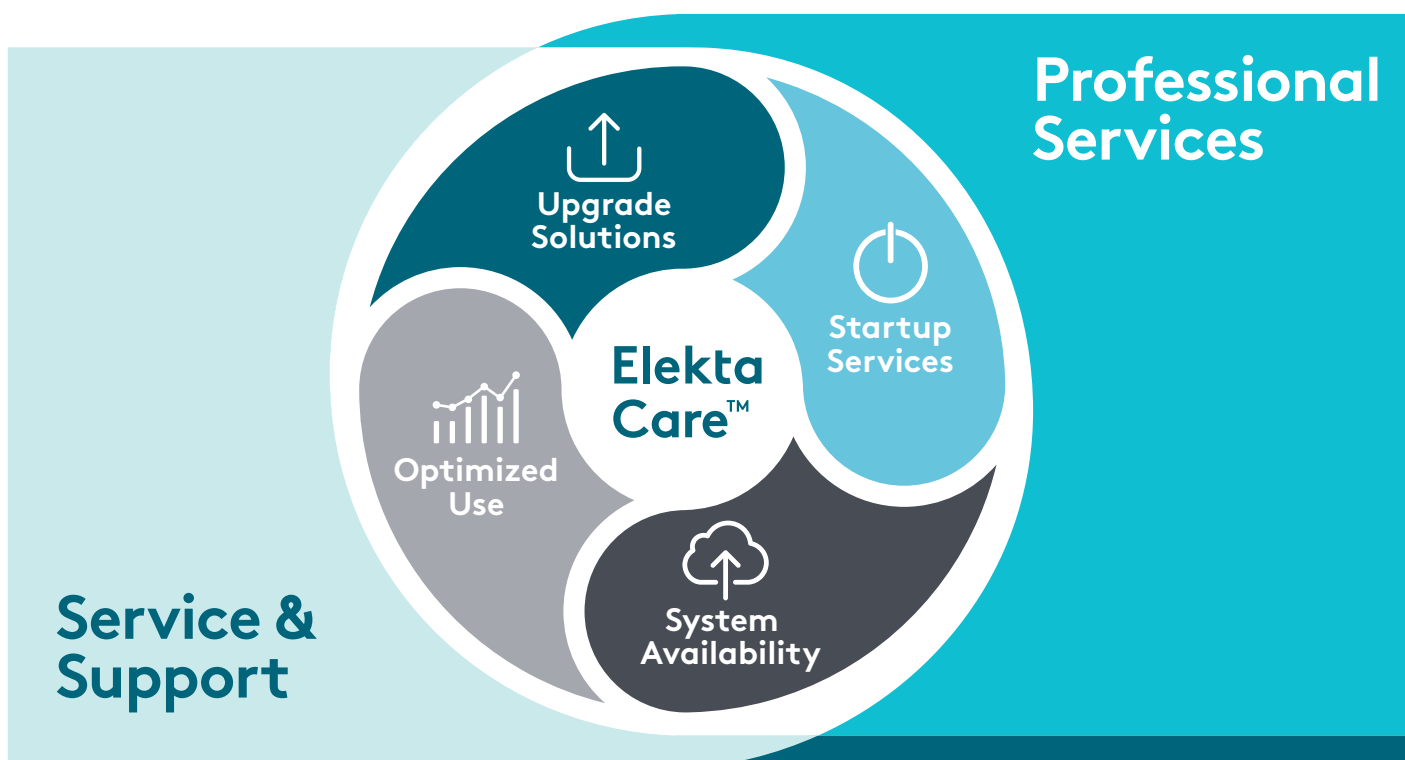

Training & Education

We offer an unprecedented range of brachytherapy training and education options that bring you up to speed with current practice and novel brachytherapy approaches.

Elekta Care™

Get the most from your Elekta brachytherapy solution

Elekta Care is designed to help you maximize the use of your Elekta technology, so you can focus on your patients and your practice.

Elekta Care™ supports you from startup through your product's lifecycle with comprehensive options from education, training and upgrades to solutions allowing you the highest uptime and improved operational efficiency.
