

Eye Surgery Stretcher

Enhanced head-end clearance for supreme surgeon access

Ideal for either superior or temporal approach

Positioning controls tuck neatly within the headpiece and allow full articulation

Optional contoured or flat headpiece comfortably supports patient during procedures

Maximum Surgical Access

Stryker's eye surgery stretcher offers the greatest head-end clearance in the industry, giving surgeons ample leg room to maneuver while performing delicate eye procedures. The firmly-locking work surface and mobile design combine to increase patient security and surgical throughput.

Enhanced-clearance, dual-articulating headpiece maximizes surgical access.

Flexible tube doubles as air delivery and drape support.
